- Introduction To Containers
- W/Docker,Kubernetes,OpenShift
- Java Basic by HackerRank
- Introduction to Microsoft Azure
- Cloud Services

SUMMARY

I am a proactive full-stack developer with a strong foundation in web development, currently in my pre-final year of study. Although I haven't had formal work experience yet, I have engaged in various personal projects and self-learning initiatives to enhance my skills and deepen my knowledge.

My expertise includes front-end technologies like HTML5, CSS3, and JavaScript, enabling me to build responsive and interactive websites. On the back end, I am proficient in Node.js, Express.js, and databases such as MongoDB and MySQL, allowing me to create robust full-stack applications. I specialize in the MERN stack (MongoDB, Express.js, React.js, Node.js) and am familiar with tools like Git and Docker, which help streamline development workflows.

I have a solid understanding of Data Structures and Algorithms (DSA) using Java, empowering me to write efficient and optimized code. This knowledge is essential for solving complex problems and enhancing the performance of the applications I develop.

I am Dedicated to staying updated with the latest trends and best practices in web development, continuously adapting to new challenges.

In addition to my technical skills, I value communication and leadership. strengths include problem-solving and project management, ensuring timely completion of tasks.

I am dedicated to staying updated with the latest trends and best practices in web development, continuously adapting to new challenges. I am eager to contribute my skills and passion to a professional environment, while continuing to learn and grow in this dynamic field.
